Faster, more intuitive, mission & role-specific Agentic AI workflows

Mission Focus

National security analysts and leaders face increasing pressure to do more with less in the information environment. What if you could use agentic AI to slash your research time from hours to minutes, boosting efficiency and reducing risk?

PULSE Discover Chat powered by Agentic AI, trained on national security doctrines and custom tailored to your specific role, provides high impact support for YOUR mission that only you can do. Ready to revolutionize your information environment?

PULSE Discover Chat enhances situational awareness by quickly surfacing key topics related to your queries—including important themes you might have missed. Discover Chat provides answers that are relevant and meaningful not just generic or misleading.

1. An analyst simply selects their role and enters their query using natural language.
2. Next, the system creates a transparent search strategy.
3. Once approved by the analyst, Discover Chat builds a query based on data in our data lake, on social media, and on the surface, Deep and Dark Webs, and provides a response.
4. Users can then apply multiple filters to refine their query, asking for a chronological ordering of events with timestamps, for example, as they construct their perfect query.

Key Features

Comprehensive

Randomly searches our LLMs, and hundreds of millions of documents to return a manageable, yet statistically relevant, sample of documents and search recommendations.

Intuitive

Simple, transparent search makes it easy to use without knowledge of Boolean Logic or Kibana; Combines multiple search types in the same query, including keyword and semantic.

Advanced

Utilizes sophisticated AI and search capabilities to uncover sentiment analysis.

Contextual

Understands and applies national security and military doctrines, frameworks, and training data to provide more on point and deeper discoveries.

Empowering

Enables IO planners, MISO analysts, targeters, and others at any level to achieve more.

Multiple Visualizations

Provides visualizations of the data, showing connections between influencers and groups, providing highly effective image analysis.

Multilingual

Translates and returns results in 75 languages.

Request a demo!

Discover Chat ties seamlessly into Two Six's dashboard, messaging capabilities, and products that focus on Russia, China and

the Southern Border of the U.S., all supported by our expert humans in the loop. See our sample search queries on the back of this product slick.

SPACE Prompt

Over the last 60 days, what are some ways that China has attempted to portray their space program is superior over the United States?

Chat displayed key findings with citations →

Clear categories and examples →

China's global relationship →

Chinese strategic messaging →

Chinese narrative →

Comparison with SpaceX →

Based on the retrieved data, I'll analyze how China has attempted to portray their space program as superior to US space programs over the last 60 days. Here are the key findings:

1. Advanced Technology Positioning

China's national space administration has declared that their space technology capabilities have "entered the world's advanced ranks" ①②③, emphasizing their rapid technological development and positioning themselves as a leading space power.

2. International Collaboration Leadership:

- China is actively showcasing their openness to international cooperation, in contrast to US restrictions:
- They've approved lunar sample sharing with US universities, while highlighting how NASA's "Wolf Amendment" prevents reciprocal Co operation④
- They're publicizing internal international partnerships through the Chang'e-8 mission, which includes 15 projects from various countries and organizations⑤

3. Strategic Program Announcements:

- China has announced several ambitious missions for 2025, including:
- The Tianwen-2 asteroid sample return mission
- Multiple crude spacecraft missions in parentheses (Shenzhou 20 and 21)
- Joint international progress projects like the SMILE satellite with Europe⑥⑦

4. Narrative Framing:

- China is positioning itself as a more collaborative partner in space exploration, using the theme, "One Space" to emphasize global cooperation⑧
- They're emphasizing their role in promoting "peaceful use of outer space" and "benefiting all mankind" implicitly contrasting with what they portray as more restrictive US policies⑨⑩

5. Commercial Space Competition:

- Chinese state media is highlighting how multiple Chinese commercial space companies are mounting serious challenges to SpaceX's dominance⑪
- They're emphasizing development of reusable rockets and other advanced technologies that directly compete with US capabilities

SOUTHERN BORDER Prompt

I'm an Intel analyst that works in a targeting team and am focused on Sinaloa Cartel. I've never researched cartels before, can you query your data lake and tell me the top things we need to know about the Sinaloa Cartel and their current operations?

3. Drug Production and Testing②

- Producing methamphetamine at "exceptional purity" levels in (97%)
- Operating sophisticated synthetic drug production network
- Importing chemical precursors from China/India through Pacific ports
- Using veterinary drugs to enhance fentanyl potency

ASSESSMENT:

The Sinaloa Cartel remains one of the most sophisticated and powerful criminal organizations globally, despite significant challenges and internal fractures. The organization demonstrates remarkable adaptability and resilience, shifting operations and alliances as needed. The recent surrender of Guzmán family members to US authorities signals potential major change in cartel dynamics and could lead to increased instability or realignment of power structures [JP2-0: Assessment of Risk in Predicting Threat Intentions, pg. xiii]

CURRENT OPERATIONS AND CAPABILITIES

3. Drug Production and Testing②

- Producing methamphetamine at "exceptional purity" levels in (97%)
- Operating sophisticated synthetic drug production network
- Importing chemical precursors from China/India through Pacific ports
- Using veterinary drugs to enhance fentanyl potency

4. International Reach②③

- Expanded operations to 40+ countries
- Major presidents in Asia, Australia, and New Zealand
- Complex money laundering operations through front companies
- Using multiple ports for precursor chemical importation

5. Recent Significant Developments:

Strategic Changes③④

- Multiple family members of Ovidio Guzmán (17 total) surrendered to US authorities
- Potential realignment of alliances between factions
- Increased cooperation with us law enforcement by some members

Operational Impact⑤

- Violence affecting agriculture operations in the Sinaloa
- Over 1,200 murders and 1,100 kidnappings in the past next 8 months
- Disruption of civilian economic activities

6. Current Threats and Vulnerabilities:

Internal conflicts⑥⑦

- Alliance between Los Mayas and Cartel del Noreste for drug trafficking
- Ongoing violence between rival factions
- Potential alliance between CJNG and certain Sinaloa Cartel factions

Law Enforcement Pressure⑧

- Recent major drug seizures by US authorities
- Increased cooperation between US-Mexico law enforcement
- New narcotics terrorism charges against key members

ASSESSMENT:

The Sinaloa Cartel remains one of the most sophisticated and powerful criminal organizations globally, despite significant challenges and internal fractures. The organization demonstrates remarkable adaptability and resilience, shifting operations and alliances as needed. The recent surrender of Guzmán family members to US authorities signals potential major change in cartel dynamics and could lead to increased instability or realignment of power structures [JP2-0: Assessment of Risk in Predicting Threat Intentions, pg. xiii]
