Hi Beverly,

Thank you for downloading the Dragos [2022 ICS/OT Cybersecurity Year in Review](#), featuring data and insights from our world-class team of OT researchers and incident responders. Our annual report is intended to showcase how the threat landscape has changed in the past year and what industrial organizations can do to better defend against cyber attacks.

In our webinar [trilogy](#) discussing the 2022 Year in Review results, Dragos industrial cybersecurity experts speak directly to the findings in the report and share how organizations can operationalize this information.

[SIGN-UP FOR ALL 3 WEBINARS →](#)

Threat Landscape – March 21, @ 1 PM EST  
New threat groups targeting ICS/OT and ransomware trends.

Vulnerability Briefing – April 18, @ 1 PM EST  
What drove the significant increase of published advisories year over year.

Lessons Learned from the Frontlines – MAY 16 @ 1 PM EST  
Avoid common pitfalls that increase the time, downtime, and expense of an incident.

[Register now](#) and join us for the first webinar on March 21st to hear first-hand from the Dragos researchers who hunt for the world's most dangerous cyber threats to industrial infrastructure.

Best Regards,

Cathy Clarke
